1. Version 0.1 (unreleased)

1.1. Changes to Project Administration

- Initial Import (RDG)
- Renamed to bring into line with naming conventions. (RDG)

1.2. Changes to the Code Base

- Changed the way we identify feeds, now embedded in a feedDescriptor file. This file can later be used to control the rendering of the feed, for example, limit the number of items displayed, add a disclaimer etc. (RDG)
