History of Changes

Table of contents

1. Version 0.2-dev (unreleased)

1.1. Changes to the Code Base

- Added RSS changes feeds for individual versions. (RDG)
- Removed todo items from changes RSS feed. (RDG)
- Add configuration options to control sorting of changes and inclusion of developer and committer lists. (RDG)
- Add list of committers and developers to changes document. (RDG)
- Enable project-level locationmap to define the location of the project:status file which contains the change notes. Therefore this can even be from a remote location. (DC)
- Add an automated index page that lists all projects in a category. Use `projectDetails/category/*.xml` to retrieve it. (RDG)
- Add an automated project index page that lists all projects grouped by Category. Use `projectDetails/category-index.xml` to retrieve it. (RDG)
- Add an automated index page that lists all projects using a specific language. Use `projectDetails/*-lang.xml` to retrieve it. (RDG)
- Add an automated project index page that lists all projects grouped by language. Use `projectDetails/lang-index.xml` to retrieve it. (RDG)
- Add an automated index page for all projects using a specified programming language. Use `projectDetails/*-lang.xml` to retrieve it. (RDG)
- Add an automated site.xml snippet that provides links to an index page for all languages in use in all projects. XInclude `projectDetails/lang_index.siteSnippet.xml` in your site.xml file. (RDG)
- Add an indexing capability for all known project descriptors. (RDG)
- Use locationmap to expose plugin resources. (RDG)
- Add projectDetails page using the DOAP.xml descriptor. (RDG)

2. Version 0.1 (25 May 2005)

2.1. Changes to Project Administration

- Initial plugin code. (RDG)

2.2. Changes to the Code Base

- Add projectDetails page using the DOAP.xml descriptor. (RDG)
- Added automatic generation of release notes by requesting **/releaseNotes_VERSION-NUMBER.xml (RDG)
- Enable the generation of changes for a specific version by requesting **/changes_VERSION-NUMBER.xml (RDG)
- Use the value "current" for the releaseNotes_* URI or specify a version number, i.e. show what is new for the latest release. (DC) Thanks to Cyriaque Dupoirieux. Fixes FOR-564.
- Replace use of document() function in changes2rss.xml with sitemap aggregation. (DC)
- Use the "title" attribute of "changes" and "todo" tags if it exists, otherwise use the hard-coded values. (DC) Thanks to Cyriaque Dupoirieux. Fixes FOR-455.

- Move ToDo and Changes pipelines to this plugin, from core. (RDG)

2.3. Changes to Design

- Added optional "notes" element to "release" element of status 1.3 DTD. This will be inserted into the release notes for that version. (RDG)
- Added better sitemap match using regexp to deal with sub-directories too. (DC)

2.4. Changes to Documentation

- Basic documentation on how to create release notes are now included on the plugins documentation index page. (RDG)
- Use relative location of images directory. (DC)

2.5. Contributors

This is a list of all people who have contributed to this release, but were full developers on the project. We thank these people for their contributions.

- Cyriaque Dupoirieux
