DdlUtils' Release Notes

Table of contents

1. ReleaseNotes

```
Changes since the migration from commons-sql to DdlUtils:

* Replaced 'commons-sql' with 'DdlUtils' in the doc and the build file
* Package names have been changed from org.apache.commons.sql to
org.apache.ddlutils
* New mailing lists ddlutils-user@db.apache.org and
ddlutils-dev@db.apache.org
* Documentation is now in Forrest format (http://forrest.apache.org)
using Forrest 0.7
* JIRA for the project has been created at
http://issues.apache.org/jira/secure/BrowseProject.jspa?id=10731
* Ant tasks have been revamped to be more user-friendly
* DdlUtils now can import data from XML files into the database
* Large scale restructuring of the SqlBuilder part into a platform and a
sql builer part
* Simplification of the public API (eg. see the "Api Usage"
documentation part)
* Update and fix of the Javadoc
```
