History of OOO conference locations

2003: Hamburg, Germany

2004: Berlin, Germany

2005: Koper/Capodistria, Slovenia

2006: Lyon, France

2007: Barcelona, Spain

2008: Beijing, China

It was time to go to
Asia!

Major changes: we're listening

New Sun Contributor Agreement (SCA)
replaced former Joint Contributor
Agreement (JCA)

LGPLv3 replaced former LGPLv2 license

Great new website look & feel,
including 1-click download

Improved tools: migration to
Subversion is done.

A distributed system being the next
step.

Community Innovation Award

In 2008 Sun announced a \$1 Million Open Source Community Innovation Awards Program, \$175,000 of that amount dedicated to OpenOffice.org

Winners received between \$3,333 and \$13,750

The winners not present at the Conference:

GOLD: Per Eriksson, Daniel Naber and Marcin Miłkowski,
Regina Henschel

SILVER: Jean-Marie Gouarné, Dmitri Popov, Bruno Cavalier
Ghisi, Gabriel Gurley, Anthony Bryan, Jim White

BRONZE: Ihsan Faisal, Guillaume Maillard (Team Leader), Filip
Molčan

HONOURABLE MENTION: Dysmas de Lassus, Alan C. Baird,
Roland Mundloch

Community Innovation Award Winners here at the Conference

Award	Name	Title	Category
GOLD	Maximilian Odendahl	Notes2	Technical, Core
GOLD	László Németh	Spell Checking	Technical, Core
GOLD	Dominique Archambault, Vincent Spiewak	odt2dtbook	Technical, Extensions
SILVER	Helge Kraak	Member Database	Special
SILVER	Olivier Ronez	The Dicollecte Project	Tools
BRONZE	Holger Brandl	OpenCards	Special
BRONZE	Kálmán Szalai (KAMI)	Extensions of Extras	Technical, Extensions
BRONZE	Joshua Martin (Team Leader)	FLUX User Interface	Special
Honourable mention	Markus Schneider	VN Thesis Template / Tutorial	Documentation

Why we are doing this

Open standards and open source have always been key elements of Sun's strategy

More and more governments and enterprises around the world mandate the use of open standards

More and more governments around the world mandate the use of open source products

Sun is the world's largest contributor to open source

We just love the project and the product

Our team at the conference

How we measure success: numbers

Downloads:

- >2.5 million a week on average (compared to about 1m/week a year ago)

- First week after Ooo3.0 launch >3m downloads

- New MAC version in high demand

Community

- 28 accepted projects

- 100+ localizations

- 1000+ contributors

- 180 code contributors

How we measure success: numbers

Around 70% of submitted patches fixed and integrated

Quality: 10.000+ bug fixes between 2.0 and 3.0

Extension Repository

- 150+ extensions

- Many different authors

- Most popular ones downloaded >300.000 times

Users: we believe to have >100 million around the globe

How we measure success: awards

CNET Top 5: Best downloads of 2007

How we measure success: awards

Best of open source productivity apps

interfaced and capabilities. The market monster is, of course, Microsoft Office, with the lion's share of all licenses for office productivity tools. In many ways, the sheer market-size weight of Microsoft Office means that it defines the category in terms of the basic functions that are required and the way they're presented. If you want or need to have a different sort of office productivity solution sitting on your desk, then, you're going to look at options defined in large part by the ways in which they differ from Microsoft Office.

One of the most obvious ways an office productivity suite can set itself apart from Microsoft's offering is through price, and that's where the four suites in this article shine: the

Suite	URL	Components
Google Docs	http://docs.google.com	word processor, spreadsheet, presentation
IBM Lotus Symphony	http://symphony.lotus.com/softw/are/lotus-symphony/home.jspa	word processor, spreadsheet, presentation
OpenOffice.org	http://www.openoffice.org	word processor, spreadsheet, presentation, database, drawing, equation editor
Zoho	Http://www.zoho.com	word processor, spreadsheet, presentation, planner, notebook,

Productivity suite

OpenOffice.org is the granddaddy of Microsoft Office alternatives. Its open source roots show in a set of features and functionality that is perfectly at home in the multiplatform, equation-heavy atmosphere of research and academe. For businesses, the only features that seem significantly lacking are those for collaborating with multiple authors. If you're looking for a single set of productivity apps that can work on a wide variety of operating systems, then OpenOffice.org is a well-supported, mature solution. [FULL REPORT ...](#)

Category: Best Project

“Let's start with the big one. The Best Project award goes to the project with the best technical design, most helpful community, and most powerful product.”

SOURCEFORGE.NET, July 2008

How we measure success: OOo 3.0 reviews

“The final version of OpenOffice 3 is out today, and if you're looking to save yourself plenty of money, download it instead of buying Microsoft Office --- you could save yourself hundreds of dollars, and not lose out on many features.”

Computerworld, October 2008

How we measure success: OOo 3.0 reviews

“...for the first time, I'm ready to recommend this new version as a viable alternative to Microsoft's offering. It still has rough edges, but it has an impressive feature set, a generally lucid interface, pure open-source credentials, and—in the current economic climate—the decisive advantage of being absolutely free.”

PC Magazine, October 2008

June 2008

How we measure success: what the competition says

"Today, they have very primitive stuff," Ballmer said of Google (Apps).

“We get more competitive pressure from OpenOffice and StarOffice.”

Steve Ballmer

CEO Microsoft, Oct. 17th, 2008

What's next

New compelling user interface

- Collaboration with other efforts in this area

- Complex, long-term effort

Performance improvements. Focus on:

- Startup (e.g. Configuration)

- Loading / Saving documents:

 - loading parts on demand

 - saving modified parts

- Calc: Spreadsheet calculations

- Impress: Slideshow performance

What's next: Template Repository

The screenshot shows the OpenOffice.org Templates website. The browser window title is "OpenOffice.org Templates - Mozilla Firefox". The address bar shows "http://templates.services.openoffice.org/". The page features a search bar, a navigation menu with "Extensions", "OpenOffice.org", "Templates", and "Login", and a language selector set to "English".

The main content area is organized into a grid of categories and sorting options:

- Categories:** Business, Education, Private.
- Sorting Options:** Highest Rated, Most Popular, Most Recent.
- Template Listings:**
 - Business:** Kreditübersicht, Formal Letter - Sagittarius, Press Release 1.
 - Education:** Formal Letter - Sagittarius, Kreditübersicht, Press Release 1.
 - Private:** Press Release 1, Kreditübersicht, Formal Letter - Sagittarius.
- Sidebars:**
 - Search:** A search input field with a "Search" button.
 - Templates:** A list of filters including Business, Education, Private, Highest Rated, Most Popular, and Most Recent.
 - Upload your Template:** A form with fields for "Username:" and "Password:", and a "Log in" button.
 - Tags:** A list of tags including "business", "correspondence", "Geschäftliches", "letter", "OH! STICKWÖRTER Plan", "press release", "Protokoll", and "TeSt", with a "more tags" link.
